

DESCRIPTION:

It is a application which can download any video directly from YouTube. It is based on Python don't need to worry about cookies anymore!

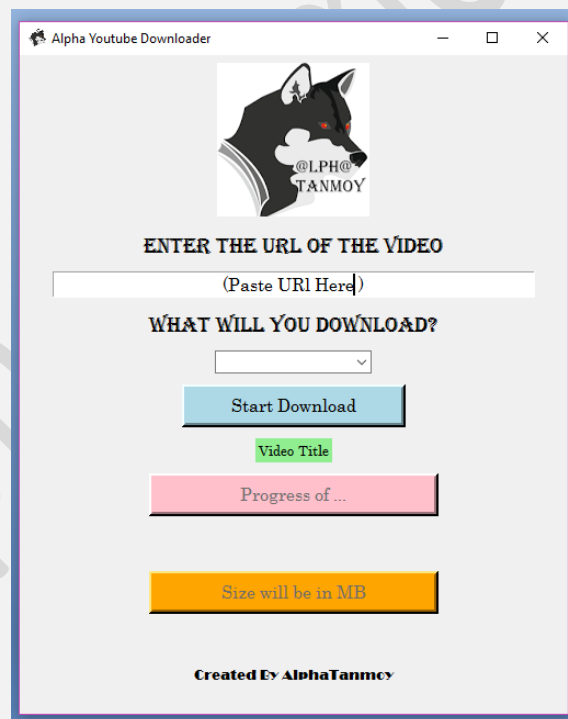

You can download Videos or Audios in mp4 format by just using the URL of the Youtube Video and Paste it on the app, and there you have it after sometime it will be downloaded on the selected Path you provide!

INSTRUCTION FOR USING:

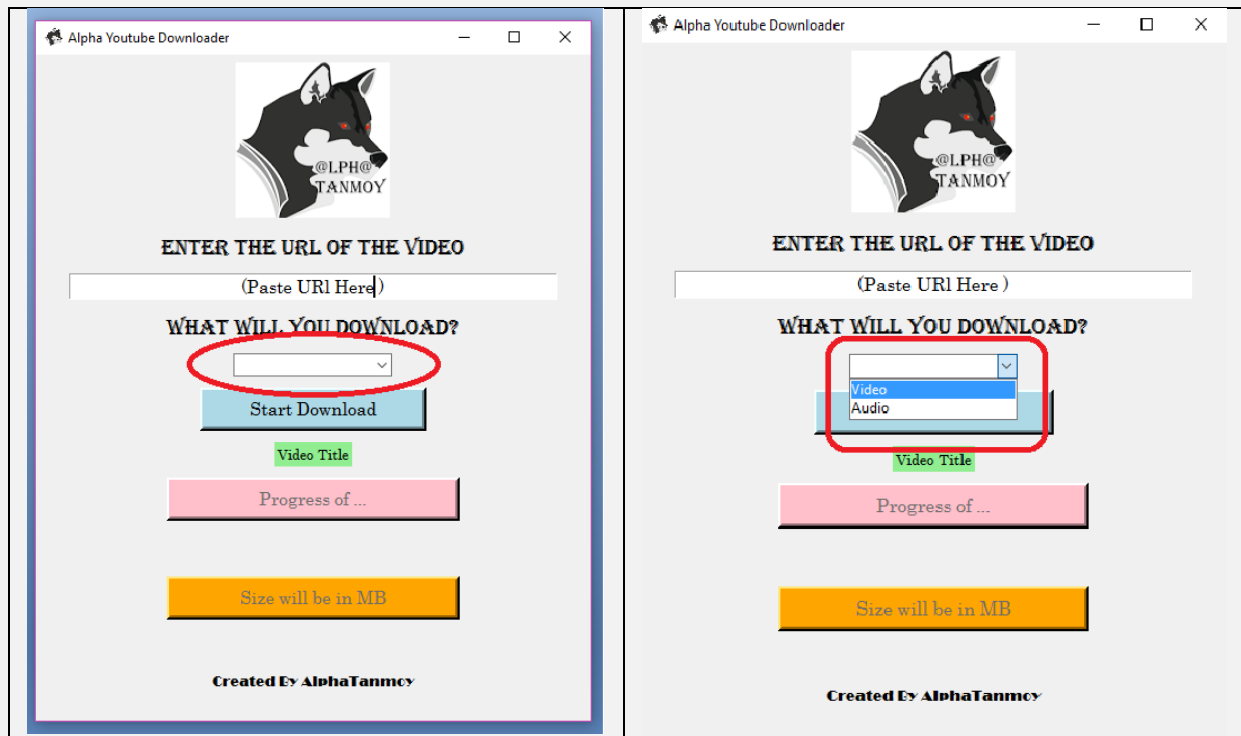

Step 1: Just open the application by using "Double Left Click".

Step 2: Copy the URL of Your Video from YouTube. [You can find the Video URL from the Share option!]

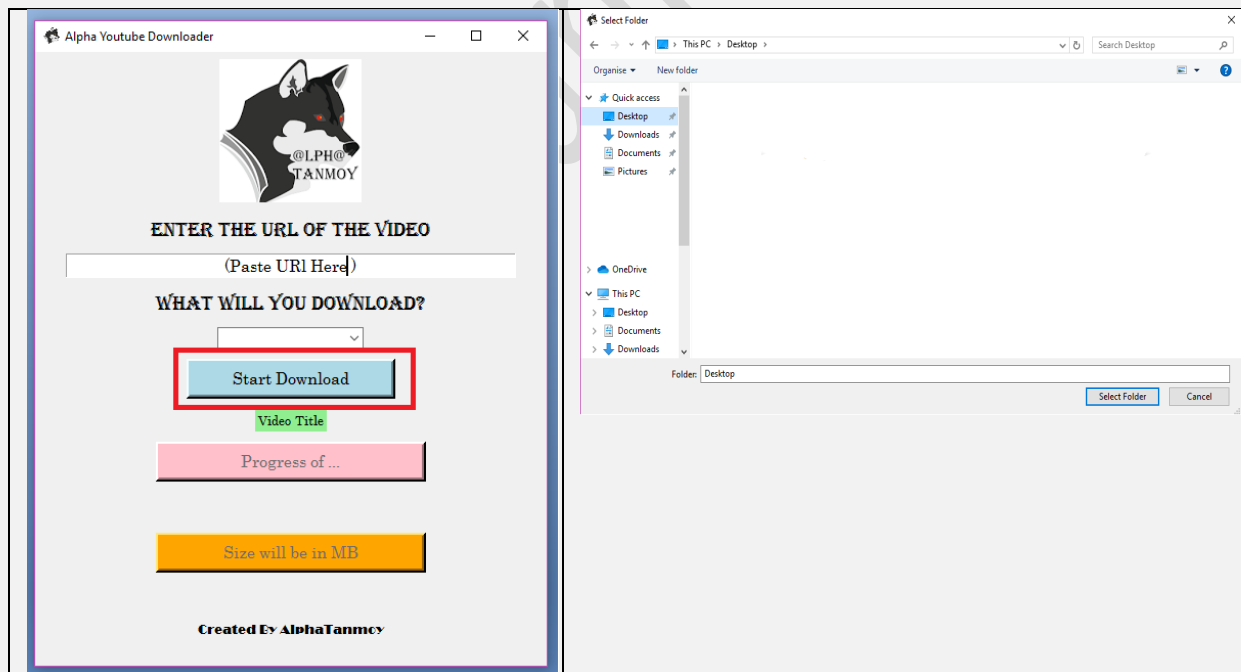

Step 3: Paste the URI

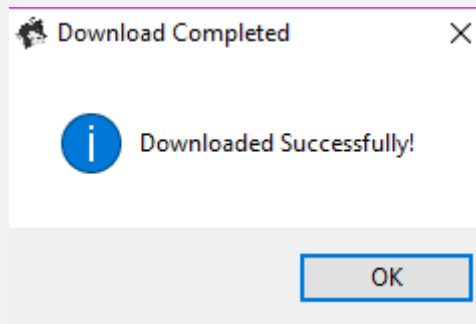

Step 4: Select Video or Audio in mp4 option from the drop down menu!

Step 5: Click on the “Start Download” Button! After Clicking it a window will pop up where you can select your Destination of your downloaded Video or Audio.

Step 6: After you selected the path Just wait little bit! (Depend on Your Network Speed!) until the window pop up which is showing “Downloaded Successfully”. Then you are free to enjoy with your downloaded object. Enjoy 😊

FEATURES:

It Shows the Title Of the Video or Audio.	It Shows the total Download Size of the Video or Audio.	It Shows the Process are you actually downloading a video or audio.

WARNINGS AND ERROR!

Case 1: If you missed click Start Download without Past the URI.

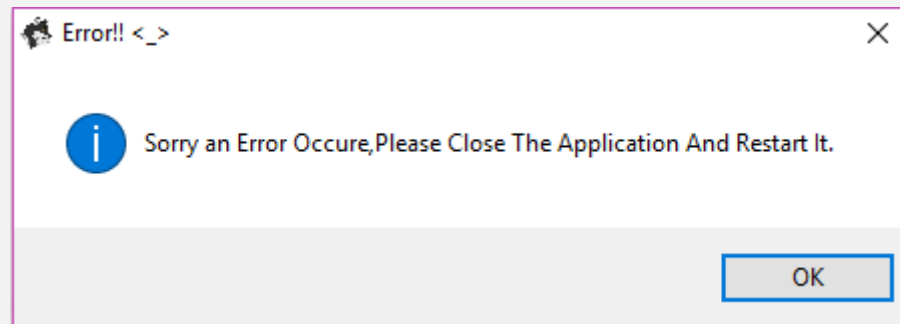

Case 2: If you use a wrong or Non-Live (Old) URL.

Case 3: If there is a Network Problem!

Case 4: If there is a problem with the storage size or the Path (Location) Selection!

For all those cause a window will pop up! All you need to do is

1. Close the Pop up window
2. Close the Application
3. Restart it.
